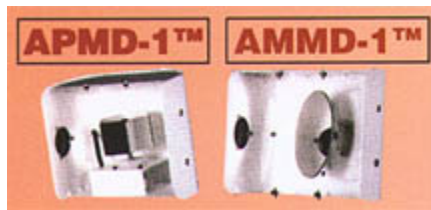

GRAPHIC PROJECTORS

DV-200™

Versatile Advertising Projector

The DV-200™ is a new developed display projector producing 5 rotating images - either slides or gobos - with a multitude of control possibilities for greater creativity. It features also a long life metal halide light source and advanced optical system for brightness and sharpness. The ARTICULIGHT™ advertising projectors series promises dynamic advertising for your products! With ARTICULIGHT™ projectors, you are no longer bound to use static posters, inflexible flyers or expensive video production in order to present your products, logo or message as an eye catcher. You may use standard 35mm slides or already designed projection patterns (gobos) either in metal or glass to project your message in the most appealing way. Whether you wish to project a simple logo onto the floor or the wall of your business establishment or to develop a whole advertising lightshow for a trade booth by using several projectors, ARTICULIGHT™ advertising projectors are always the best choice. Our extensive product line is tailored to fit any of your visual applications. The most outstanding feature of the ARTICULIGHT™ advertising projectors are the ease of operation, control and flexibility. Within seconds, you can change slides or gobos in the projector by simply opening the service lid and pushing a button to move the desired image into position. The ARTICULIGHT™ advertising projectors have been designed for the most varied applications in display, retail and entertainment environment. Your message will be displayed prestigiously with ARTICULIGHT™ advertising projectors at trade shows, in display windows, in restaurants, or in supermarkets, in P.O.P. applications and in shops just to name a few.
