LIGHTING CONTROL SYSTEMS

FRONTIER

The Frontier is specially designed for fixed installations that require a standalone replay unit for pre-programmed lighting sequences. This allows venues like clubs, pubs and restaurants to operate their lights in an easy and user-friendly way, while preventing anyone from accidentally erasing any of the programs.

The 19" rack mountable unit offers playback of 16 different sequences, programmable by VDMX. Additionally, the Frontier is fitted with a manual speed control dial and audio input for automatic beat-triggering. The illuminated buttons and its clear layout make the use of the device very ergonomic, particularly important in the expected low-lit environments. In addition to its standalone capabilities, the Frontier also functions as a direct DMX Output for VDMX when used in live situations.

STANDALONE PLAYBACK

The Frontier allows for continuous automatic playback of preprogrammed sequences to infinity.

BEAT TRIGGERING

Insert an audio signal into the device and have the sequences triggered by beats detected in the music.

ILLUMINATED CONTROLS

The ergonomically designed Frontier is well laid out with illuminated buttons that make this device ideal to work with in low-lit environments like DJ booths, clubs and bars.

SPECIFICATIONS:

Number of DMX channels: 512
Audio input: Line level, mono 6.3mm Jack connector
Data isolation: typically 1600V rms (1 minute)
Dimensions: 19" 1HU, 482 x 200 x 44 mm (19 x 8.5 x 1.75 inches)
Weight: 2.25 kg (5.0 lbs)

MINIMAL SYSTEM REQUIREMENTS

- Microsoft Windows 2000/XP
- USB-port

DUE TO CONTINUOUS IMPROVEMENTS, SPECIFICATIONS MAY CHANGE WITHOUT PRIOR NOTICE.
